- Head region: Sketch the eyes on stalks, the antennae, and mouthparts.
- Appendages: Add the walking legs (pereiopods) on the sides of the cephalothorax, ensuring they are proportionate.
- Abdominal segments: Draw horizontal lines to denote segmentation, and add pleopods underneath the abdomen.
- Tail fan: Sketch the uropods and telson at the posterior end.

Step 4: Add Internal and External Details

- Carapace: Shade or outline the dorsal shell covering the cephalothorax.
- Gills: Indicate gills under the carapace (these may be visible in detailed diagrams).
- Muscle and internal structures: For advanced illustrations, include internal features like the stomach or digestive tract, if visible or relevant.

Step 5: Finalize the Drawing with Details and Labels

- Refine the lines: Go over your sketch with a darker pen or pencil, emphasizing the outline.
- Label each part: Use clear, straight lines with arrows pointing to each feature, and write the

names neatly.

- Add shading or color: To give a three-dimensional effect, add shading, or use colors typical of prawns (pink, brown, or transparent).
